

# LANsense Fibre Patch Cords

## LC Duplex LANsense Patch Cord - OS2

**Nexans Ref.:** N884.4LLY5

- Additional copper pin for port detection
- High bandwidth OS2 fibre
- Available with LC connectors

### DESCRIPTION

The LC LANSense patch cord uses the standard LC duplex connector, enabling high-density fiber connections to be achieved. The LC LANSense cord, however, has an over-boot to incorporate the sensing capability of the LANSense products. The LANSense patch cords are available in both high bandwidth OM4 and single-mode OS2 fibre types and so offer a comprehensive range of patch cords for interfacing with the latest network equipment.

**LANsense™**

### STANDARDS

**International ISO/IEC 11801**
