

# LANsense Fibre Patch Cords

## LC Duplex LANsense Patch Cord - OM4

**Nexans Ref.:** N884.7LLO1

- Additional copper pin for port detection
- High bandwidth OM4 fibre
- Available with LC connectors

### DESCRIPTION

The LC LANSense patch cord uses the standard LC duplex connector, enabling high-density fiber connections to be achieved. The LC LANSense cord, however, has an over-boot to incorporate the sensing capability of the LANSense products. The LANSense patch cords are available in both high bandwidth OM4 and single-mode OS2 fibre types and so offer a comprehensive range of patch cords for interfacing with the latest network equipment.

**LANsense™**

### STANDARDS

**International ISO/IEC 11801**

# LANsense Fibre Patch Cords

LC Duplex LANSense Patch Cord - OM4

## CHARACTERISTICS

### Construction characteristics

Colour	Orange
Connector type	LC
Fiber optic type	OM4 50/125

### Transmission characteristics

Optical performance	-
---------------------	---

### Usage characteristics

Component function	Patchcord
Length	1 m
