

Press release

Nexans to deliver umbilicals to the West Nile Delta Taurus Libra project in Egypt

Paris, September 17, 2015 –Nexans has been awarded the contract to deliver 48km of static umbilicals to BP, and partner DEA, for the West Nile Delta Taurus Libra project in Egypt. The Taurus Libra development is a subsea project tied in to existing BG Group operated Burullus facilities, and the umbilical delivery forms an important part of this subsea development.

The umbilicals consist of electrical and fibre optic cables as well as hydraulic and chemical lines. They will be designed, engineered and manufactured at Nexans' specialized subsea cable and umbilical facilities in Halden and Rognan, Norway. Nexans will also deliver accessories for this project. The delivery will take place in May 2016.

"This contract forms part of the 10-year frame agreement Nexans concluded with BP to supply umbilical cables, DEH systems, accessories and services for various deep-water oil and gas projects across the globe," says Krister Granlie, Executive Vice President, Hybrid Underwater Cables Division, Nexans Norway. "It represents further recognition of Nexans as a key player in the umbilical market and builds on a long relationship between BP and Nexans for the deliveries of umbilicals."

About the West Nile Delta fields

West Nile Delta project involves the development of gas and condensate fields located within the North Alexandria and West Mediterranean Deepwater concessions in the Mediterranean Sea, approximately 65km to 85km off the coast of Alexandria, Egypt.

The Taurus Libra development, discovered in 2000/2001, is part of the first development phase of the West Nile Delta fields.

About Nexans

Nexans brings energy to life through an extensive range of cables and cabling solutions that deliver increased performance for our customers worldwide. Nexans' teams are committed to a partnership approach that supports customers in four main business areas: Power transmission and distribution (submarine and land), Energy resources (Oil & Gas, Mining and Renewables), Transportation (Road, Rail, Air, Sea) and Building (Commercial, Residential and Data Centers). Nexans' strategy is founded on continuous innovation in products, solutions and services, employee development, customer training and the introduction of safe, low-environmental-impact industrial processes.

In 2013, Nexans became the first cable player to create a Foundation to introduce sustained initiatives for access to energy for disadvantaged communities worldwide.

Nexans is an active member of Europacable, the European Association of Wire & Cable Manufacturers, and a signatory of the Europacable Industry Charter. The Charter expresses its members' commitment to the principles and objectives of developing ethical, sustainable and high-quality cables.

We have an industrial presence in 40 countries and commercial activities worldwide, employing close to 26,000 people and generating sales in 2014 of 6.4 billion euros. Nexans is listed on NYSE Euronext Paris, compartment A.
